Volume 35, 1987, Numbers 1–3

CONTENTS

Numbers 1/2 PAGE

The role of hepadnaviruses in hepatocellular carcinoma: *W. S. Robinson, R. H. Miller and P. L. Marion* 1

Metabolism of the diaminoantifolates: Biosynthesis and pharmacology of the 7-hydroxyl and poly-glutamyl metabolites of methotrexate and related antifolates: *L. H. Matherly, R. L. Seither and I. D. Goldman* 27

Metabolism and reactions of quinoid anticancer agents: *G. Powis* 57

Adaptive changes in thermoregulation and their neuropharmacological basis: *K. Brück and E. Zeisberger* 163

Effect of anticancer drugs on drug metabolism: *L. Slørdal and J. Aarbakke* 217

The role of reward pathways in the development of drug dependence: *R. A. Wise* 227

Number 3

Behavioral pharmacology of minor tranquilizers: *S. E. File and S. Pellow* 265

Metabolism of triazine anticancer agents: *M. D'Incalci* 291

Metabolism and reactions of alkylating agents: *P. B. Farmer* 301

Treatment perspectives in drug misuse: The opiate paradigm: *B. B. Johnston* 359

Drug metabolism in extrahepatic diseases: *G. C. Farrell* 375
